PROFILE

A strong foundation in both front-end and back-end development. I am enthusiastic about creating efficient, responsive, and user-friendly web applications and mobile applications and continuously improving my skills through hands-on experience and self-learning

EXPERIENCES

2025 Jan - Present   AIR Studios Co.
Associate Software Engineer

- Contributing to full-stack applications using MERN stack/Next and Augmented Reality
- Enhancing performance and scalability of web platforms
- Working in an Agile environment, collaborating on UI/UX design

2024 July - Dec   AIR Studios Co.
Intern Software Engineer

PROJECTS

Personal Portfolio Website – You can view all the projects I've worked on through this website

https://my-portfolio-gtcu.vercel.app

- Engineered a dynamic personal portfolio leveraging React with Vite to ensure a fast, optimized user experience.
- Integrated Three.js to render interactive 3D objects, demonstrating advanced frontend and animation skills.
- Implemented a fully responsive and modern UI using Tailwind CSS for utility-first styling.

Camera Rent E-Commerce Website with Admin Panel
